

IM512

512 kb/s ISDN INVERSE MULTIPLEXER

**56 TO 512 kb/s
ON DEMAND**

KEY-FEATURES

- 56 TO 512 kb/s OVER ISDN
- 4 EURO-ISDN BASIC RATE INTERFACES
- AUTO-DIALING: SYNCHRONOUS V25b / X21 / RS366 / DTR
- BONDING 1 / 2 / 3 SYNCHRONIZATION
- 64 kb/s T.A. INTEROPERABILITY
- REMOTE MAINTENANCE THROUGH ISDN
- 2 DTE V11 / RS449 / V35 PORTS
- INMARSAT -COMPATIBLE

APPLICATIONS

LEASED LINE BACKUP AND OVERFLOW

VIDEOCONFERENCING

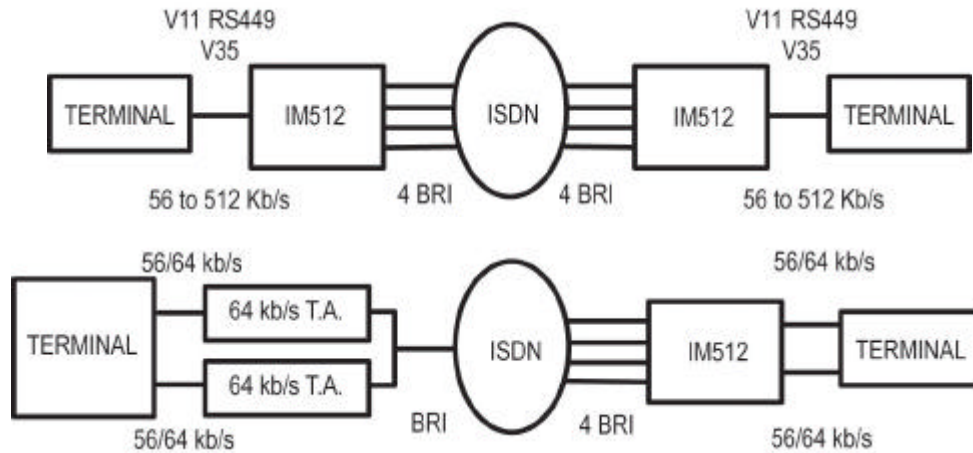

TRANSFER OF LARGE DATA VOLUMES

With its 4 ISDN basic rate interfaces (BRI), the IM512 inverse multiplexer lets you dial up a synchronous ISDN communication with a user-selectable bandwidth from 56 to 512 kb/s.

Easy to install with its integrated installation menu (VT100 terminal), it offers various call command possibilities.

Because it uses the BONDING synchronization standard, the IM512 is compatible with most inverse multiplexers and 56 / 64 kb/s terminal adapters.

IM512

56 TO 512 KB/S ON DEMAND

After a command is issued by the user or automatically with standardized call sequences, the IM512 dials the party's number and sets up and synchronizes the ISDN B channels. In just seconds, a connection providing a data rate up to 512 kb/s is established between two data terminals such as IP routers, data and voice or X25 multiplexers, video co-decs ...

COMPATIBLE

The IM512 is approved all around Europe. Moreover, it uses the ANSI and ISO BONDING™ synchronization standard, allowing communication with most inverse multiplexers and all terminal adapters worldwide, whether they are connected to an ISDN at 56 or 64 kb/s.

FLEXIBLE

The IM512 can be programmed to autodial using one of the standard command sets: Synchronous or asynchronous V25 bis, X21, RS 366, DTR control lead ...

CHARACTERISTICS

Performance	One 56 to 512 kb/s session via port 1 or two 56 or 64 kb/s via port 1 and port 2 Internetworking with a unit connected to a 56kb/s ISDN network
Port 1	56 to 512 kb/s. synchronous RS449 or V24-V11 or V10 (V35 adapting with cable) DB37 female connector
Port 2	56 or 64 kb/s. synchronous RS449 or V24-V11 or V10 (V35 adapting with cable) DB37 female connector
Auto-dialing	Synchronous V25 bis (port 1) RS366 (port 1 and port 2) Asynchronous V25 bis (CONTROL port) DTR control lead (port 1) VT100
Configuration	VT100 Terminal (WINDOWS Hyperterminal)
ISDN	4 basic rate interfaces (BRI)
INMARSAT	Possibility to use only one Bchannel per S0 interface for compatibility with ISDN / INMARSAT adapters
Channel aggregation	BONDING modes 0 / 1 / 2 / 3
Differential delay compensation	512 ms between B channels
Loops	3C, 2B, A, 4, remote loop
Setup	Local via VT100 or ASCII. Software downloading through ISDN
Dimensions	222 X 50 x 285 mm (L X H X D)
Power supply	110 or 230 VAC +10%
Operating T°	+10 °C to +50 °C
Electrical safety	CEI 801-2 level 4
EMC	CEI 801-3 level 2 / CEI 801-4 level 2
