

MAGNETIC WI-FI ANTENNA

The mobile antenna is designed for installation on a vehicle or on a metal surface. The magnetic attachment system is easy to be removed as the solution does not require drilling, the cable being positioned on the side. It comes with a 1m cable with a RP-SMA-connector plug.

CARACTERISTIQUES

	Electrical
Type	Omnidirectional
Frequencies	2400-2500 MHz
Impedance	50Ω
Polarization	Vertical
TOS (VSWR)	<1,9 :1
Opening angle H/V	360°/N.C.
Gain	5 dBi

	Mecanical
Material	Thermoplastic
Dimension (H/L)	180 x 8 mm
Fixation	Magnetic
Cable	1 meter (RG174)
Connector	RP-SMA-Plug
