

MAGNETIC CELLULAR ANTENNA

The mobile antenna is designed for installation on a vehicle or on a metal surface. The magnetic attachment system is making it easy to remove a solution. It does not require drilling, the cable being positioned on the side. It comes with its mounting system and with its 3m cable with SMA male connector.

CHARACTERISTICS

Electrical	
Type	omnidirectional
Frequencies	<ul style="list-style-type: none"> • 824-960 MHz pour le GSM 900 • 1710-1880 MHz pour le GSM 1800 • 1920-2170 MHz pour l'UMTS • 2400-2700 pour le WLAN et LTE
Impedance	50Ω
Polarization	Vertical
VSWR	<1,5 (except for frequencies <890Mhz)
Gain	Up to 5 dBi
Power Max.	30 W
Cable	RG174 3 m
Connector	SMA-m

Mécaniques	
Material	UV stabilized thermoplastic
Wind max.	200 km/h
Dimension	300 x 31 mm
Temperature	-40°C à +85°C
Fixation	Magnet
