ETIC Telecom Security Notice

N2601 – PHP2Shell (CVE-2026-109618 / CVE-2026-109619): ETIC Telecom products not affected

Status: NOT AFFECTED
No ETIC Telecom product or service is affected. No action is required.

Reference: N2601
Published: 10/22/2026
Last modified: 10/22/2026

Context and scope

CVE-2026-109618 and CVE-2026-109619 ("PHP2Shell") affect the PHP interpreter and only expose systems running PHP code. ETIC Telecom has checked its whole portfolio.

Product / service	Models / versions	Status
RAS routers	All models, all firmware versions	Not affected
IPL routers	All models, all firmware versions	Not affected
XSLAN switches	All models, all versions	Not affected
M2Me service	Servers, portal, mobile apps – no publicly exposed PHP interface	Not affected

Recommended good practices

Keep routers up to date with the latest firmware.
Do not expose the web administration interface directly to the Internet (use M2Me or a VPN).
Use strong passwords unique to each device.
Restrict administration access to authorized networks.
